Note: Pre-authorized checks have been universally accepted in the banking industry for years. Moreover, faxing a check is just as safe as mailing a check. In fact, it's much safer than providing credit card information. You can further assure that this process is entirely legal and proper as provided in the Uniform Commercial code Title Three "Commercial Paper".

Please remember that the purpose of your faxed check is to provide us with the correct information to create an accurate check, and for you to retain a permanent accounting record. Also, please remember that this faxed check contains no other information than would appear on any check you would have mailed to us, and thus it poses no additional risk to security.

You should retain the original check for your records.
